

Howdy, I'm

Brian Travers

Chicago-based front-end engineer with a background in graphic design and 10+ years of agency experience building modern, CMS-driven web applications.

Approach

- I build modern web applications with a thoughtful combination of hand-written and AI-assisted code, focusing on scalable architecture, reusable components, and maintainable front-end systems.
- I enjoy owning products beyond launch—evolving CMS platforms, integrating APIs, improving publishing workflows, and partnering with designers, marketers, and stakeholders to continually improve the user experience.

Work History

Notorious111 (previously HZ) 2022-2026

Developer. Built and maintained CMS-driven web applications for enterprise and consumer brands using modern front-end frameworks. Collaborated across strategy, design, and development teams while owning complex features, API integrations, and long-term platform improvements.

88 Brand Partners 2014-2022

Developer and Senior Developer. Built responsive marketing websites, interactive experiences, and custom digital applications while helping establish front-end architecture and serving as the agency's motion graphics lead.

Promotional Products Partners 2005-2014

Graphic Designer. Led the company's graphic's department while expanding its digital presence through website development and online marketing. This role sparked a transition from graphic design into front-end development and laid the foundation for a career focused on building digital products.

Education

Saint Mary's University of Minnesota 2000-2004
